

The figure displays three horizontal color calibration charts, each consisting of 20 overlapping circular color patches. The top chart, labeled 'Lab', shows a smooth gradient from red to blue. The middle chart, labeled 'HCL', shows a similar gradient but with a more pronounced magenta/purple hue in the middle. The bottom chart, labeled 'Cubehelix', shows a gradient that is more uniform in appearance, with a slight shift towards blue in the middle. All three charts are set against a dark background with white vertical grid lines at 0, 0.5, and 1.
